Title:

Family planning and gynecology inclusion

Description (EN):

These photos were taken in a workshop with the Family Planning Center (FPZ) Balance in Berlin.

The Berlin Family Planning Center BALANCE (FPZ) offers advice and medical help on sexuality, family planning and relationships. It is unique in Berlin due to its integrative concept and diversity-conscious attitude. The FPZ supports all people regardless of age, origin, etc. with preventative, health-promoting and medical services. The aim is to strengthen individual resources and sexual self-determination. The FPZ makes a social contribution to information and education. It has been PQ-Sys®-certified since 2008 and has been awarded the "Berlin barrier-free" seal since 2011.

The photo was taken as part of a series of workshops on inclusive communication organized by Sozialhelden e.V. and funded by the German Foundation for Engagement and Volunteering ([DSEE](https://www.dsee.de/)).
